

I OPPOSE HR 4026. The reason being, if I am willing to pay for a service that is offered to me, I should be able to receive that service without interference from the Government or from agencies which were created many years ago before the technology was envisioned.

I also opposed and STILL OPPOSE the telecommunications act from a few years ago that currently DENIES my receiving a satellite signal of ABC because the local ABC carrier will not sign a waiver nor offer its service through Dish network. I feel the same about satellite TV, that if I want to pay for ABC, then I should receive ABC whether it is local or New York or Atlanta or whatever. I don't want to see the same thing happen all over again.
